

“CRIME AND JURISDICTION IN CYBERSPACE: TOWARDS SOLUTIONS”

Wednesday, December 20th, 15:00-16:30

Workshop WS149, Room XXV - E, United Nations Office at Geneva (UNOG)

Securing electronic evidence in criminal investigations is a growing challenge for criminal justice authorities as evidence is increasingly moving between multiple jurisdictions. This raises complex questions and has major implications for the rule of law and security but also human rights in cyberspace.

Join this interactive session for a discussion on possible solutions with international experts from the European Commission, law enforcement, tech industry, Council of Europe and civil society.

SPEAKERS

Alexandru Frunza-Nicolescu
